EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Claims 6,7,10,11,12 and 16 previously withdrawn from consideration as a result of a restriction requirement, requires all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between inventions species 1-5, as set forth in the Office action mailed on 05/18/2005, is hereby withdrawn** and claims 6,7,10,11,12 and 16 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim(s) including all the limitations of an allowable claim is presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01. Therefore claims 1, 4, 6-8, 10-19, 21-24 are allowed.

Allowable Subject Matter

1. Claims 1, 4, 6-8, 10-19, 21-24 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record, neither anticipates nor renders obvious the following limitations as claimed:

Art Unit: 2622

[Claims 1, 22 and 24]: Prior art of record does not disclose nor fairly suggest An image pick up module, comprising: “a single-piece circuit board which is electrically bonded to said image sensor, said circuit board having at least three sections integrally connected with one another, with a first section and a second section extending in spaced relation one to the other extend substantially in parallel one to the other and obliquely or crosswise to said image pick-up surface of said image sensor and a third section being arranged between the first and the second sections, wherein said third section has a substantially V-shaped configuration, said circuit board being folded from a planar board blank comprising at least said integrally formed first, second, and third sections, said third section of said blank being arranged between said first and second sections of said blank”.

Discussion of prior art

3. The prior art Pelchy (5,754,313) teaches a structure of an image sensor with a circuit board. However the reference fails to teach the shape of the circuit board having a first section and a second section extending in spaced relation one to the other extend substantially in parallel one to the other and obliquely or crosswise to said image pick-up surface of said image sensor and a third section being arranged between the first and the second sections, wherein said third section has a substantially V-shaped configuration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
